| Software Function | |
| Long Range | Ports 1 to 4: up to 300 m. Long range performance may vary depend on camera model or cable condition. |
| VIP Port | Ports 1 to 2: data on VIP ports is preferentially forwarded when bandwidth resources are insufficient. |
| Port Isolation | Ports 1 to 4: port isolation mode to improve network security Ports in an isolation group cannot communicate with each other, but they can communicate with ports outside the isolation group. |
| PoE Watchdog | Ports 1 to 4: auto detect and restart the cameras that do not respond. |
| Link Aggregation | Link aggregation is used to aggregate multiple physical ports to form a logical port for load balancing, bandwidth expansion, and port protection. Support static link aggregation. Support 1 aggregation group(s). |
| Loop Prevention | Loop prevention is used to prevent the switching network from forming loops, which will seriously affect network communication. Disabled by default. Support 802.1D STP. Support 802.1w RSTP. |
